PROFESSIONAL SUMMARY

Frontend Software Engineer with 5+ years of experience building scalable, enterprise-grade single-page applications with Angular (v14+), React and TypeScript across the fintech, healthcare and government sectors. Experienced in multi-tenant architecture, role-based access control, state management with NgRx and Redux, and WCAG-compliant accessible interfaces. Proven record of improving application performance, reducing production defects through structured code review, and integrating cleanly with .NET REST APIs. Comfortable owning features end to end in Agile teams and mentoring junior engineers.

TECHNICAL SKILLS

Frameworks & Libraries: Angular (v14+), React, NgRx, Redux, RxJS, Angular Material, PrimeNG, Bootstrap

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, SQL, C#

Backend & APIs: REST APIs, .NET integration, WebSockets, third-party API integration

Testing: Jasmine, Karma, unit testing, component testing

Tools & Practices: Git, Bitbucket, Jira, Postman, Webpack, Angular CLI, CI/CD build pipelines

Architecture & Concepts: Single-page applications, multi-tenant architecture, RBAC, lazy loading, change detection optimization, responsive design, WCAG 2.1 accessibility, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer (Frontend)

Vertex IT Solutions, Pakistan | Sep 2025 - Present

- Built reusable Angular and React component libraries that reduced feature development time and standardized UI patterns across multiple client projects.
- Integrated REST APIs with centralized error handling, retry logic and optimised data synchronisation, improving reliability of data-heavy screens.
- Led code reviews and mentored junior developers on Angular best practices, RxJS patterns and performance optimization.
- Streamlined frontend build and deployment using Angular CLI and Webpack, shortening release cycles.
- Partnered with product managers, designers and .NET backend engineers to define API contracts and deliver responsive, user-friendly interfaces.

Software Engineer (Frontend)

Jab Companies, Remote (Guyana) | 2023 - Aug 2025

- Developed a government Pensioner Portal from scratch in Angular, meeting WCAG accessibility standards and usability requirements for elderly users.
- Built a digital wallet application in React and Redux with secure authentication, transaction tracking and currency switching.
- Delivered healthcare modules for patient records and appointment management with real-time data updates over WebSockets.
- Maintained and extended multi-tenant Angular applications with secure role-based access control across tenant boundaries.
- Improved application performance through lazy-loaded feature modules and OnPush change detection, reducing initial load times.
- Introduced a structured pull-request review process that measurably reduced production defects across the frontend team.
- Worked with .NET backend teams to define data contracts and resolve API performance bottlenecks.

Software Engineer (Frontend)

Veroke, Pakistan | 2022 - 2023

- Built an investment platform featuring analytics dashboards, financial data visualization and document management.
- Developed reusable Angular components with RxJS and Angular Material for consistent cross-browser behaviour.
- Implemented role-based B2B workflows for partner onboarding and contract management.
- Collaborated with design teams to deliver pixel-accurate, responsive UI implementations.

Software Engineer (Frontend)

Cognitive Healthcare International (CHI), Pakistan | 2020 - 2022

- Developed clinical applications for doctors and administrative staff, optimizing high-frequency workflows to reduce clicks and friction.
- Implemented patient management, medical records and appointment scheduling modules with live data updates.
- Integrated frontend applications with .NET APIs and resolved performance bottlenecks affecting critical clinical workflows.
- Ensured secure handling of sensitive healthcare data in line with client privacy and compliance requirements.

KEY ACHIEVEMENTS

- Delivered 10+ production applications across fintech, healthcare, government and SaaS domains.
- Reduced page load times through lazy loading, bundle optimization and change detection tuning.
- Lowered production defect rates by introducing structured pull-request review standards.
- Collaborated with international clients and distributed teams across the USA, UAE, KSA, Germany and Guyana.
- Mentored junior developers and owned technical decisions as a senior contributor on multiple projects.

EDUCATION

Bachelor of Science in Computer Science

Arid University, Pakistan | 2016 - 2020

Coursework: software engineering, data structures, algorithms, databases and programming fundamentals.
